

STRAND	TITLE	MONTHS TAUGHT
Strand 1	Expressions and Equations Numerical Expressions Whole number exponents Properties of Operations One-variable equations and inequalities Dependent/Independent variables	August September mid-October
Strand 2	Geometry Area Surface Area Volume	mid-October November
Strand 3	The Number System Multiplication of fractions Division of fractions Compute multi-digit numbers Common factors & multiples	December January February
Strand 4	Ratios and Proportional Relationships Ratio concepts/reasoning	March mid-April
Strand 5	Statistics and Probability Statistical variability Distributions	mid-April May

- Day-to-day pacing is left to the discretion of the individual collaborative teams. Follow the district monthly pacing to help guide the daily lesson plans. (For example, complete teaching Strand 1 “Expressions and Equations” concepts by the middle of October).
- Teachers are expected to use formative assessments regularly to guide instruction, intervention, remediation, and enrichment.
